Summary

BOOMERANG is an urban element in coloured cast stone, designed to integrate public spaces that need a pleasant counterpoint that welcomes communication, movement and play. As its name and shape suggest, this seat evokes the character of a toy designed to fly and be shared. This product is part of the NEW BENCHES FOR GRAN VIA IN BARCELONA collection, a suite of multiple seats and bench series for multiple uses, with references to the realm of fossils and shells, aimed at representing the true dimension of our ancestral nature. Each of these items has a unique geometry. The different shapes, sizes and materials of these products bring different elements and situations to mind. BOOMERANG reminds us of flying objects, CARGOL transports us into the animal realm, DESIERTO belongs to mineral environments, while PUFF and ÉXTASIS point to the intimacy of the home. These designs have smooth or rough surfaces, sinuous or angular curves, all awakening and stimulating our senses and imagination in different ways.
